

**PRODUCT  
OVERVIEW**

**INTAMIN**

Widely regarded as the key attraction in any amusement or theme park, many types of roller coasters have been developed by **INTAMIN** to provide thrills and excitement for all ages. This product line is and will continue to be refined by **INTAMIN** on a mission to always set new limits.

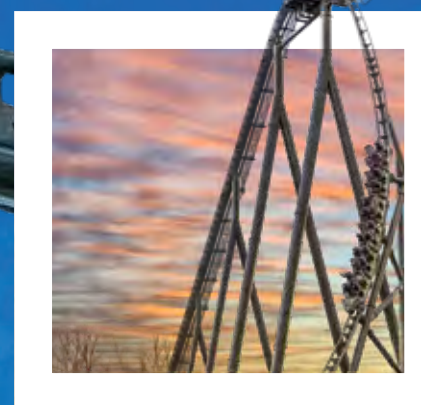

Some of our worldwide achievements:

- Highest and Fastest Roller Coaster
- Fastest Multi Launch Coaster
- Fastest Catapult Drive (LSM)
- Longest Launch Coaster
- Strongest LSM Launch
- Highest Number of Track Intersections (116 times)
- Several further World Records and numerous Global Awards
- Red Dot Award for Track Design «Best of the Best» 2021

#### GIGA COASTER

Record-breaking heights with blistering speed, airtime and fast transitions.

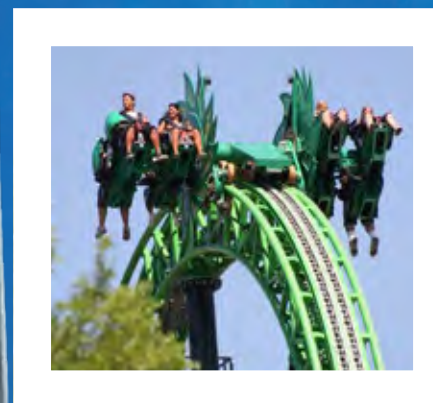

#### MEGA COASTER

Going big in height, speed, airtime and g-forces. Available with inversions.

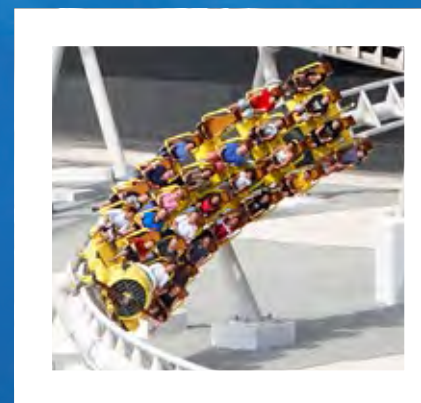

#### ULTRA COASTER

Medium-size coaster packed with airtime – every coaster enthusiast's dream.

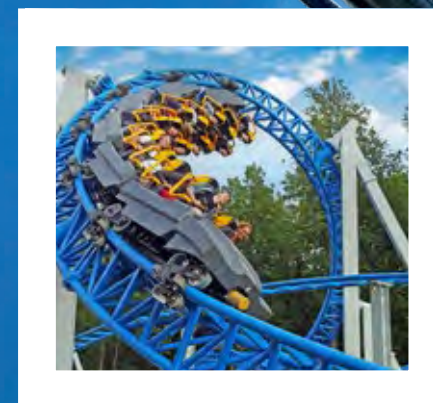

#### ZAC SPIN COASTER

Intense flipping, eye-catching, space-saving ride, with launch option.

#### WING COASTER

Passengers on the outer seats with feet in the air, experiencing airtime and speed.

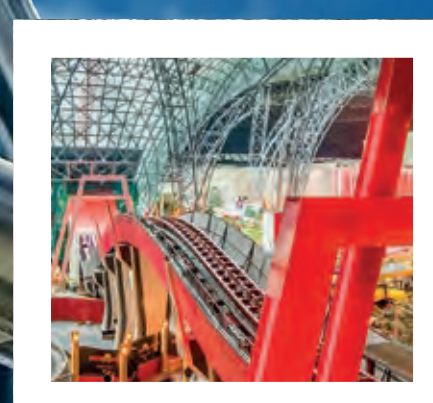

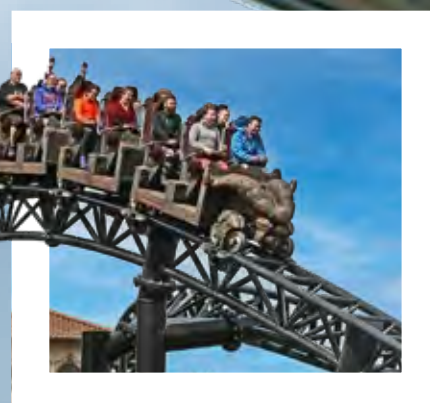

#### MULTI INVERSION COASTER

Dynamic ride providing multiple inversions, utilizing the most comfortable trains.

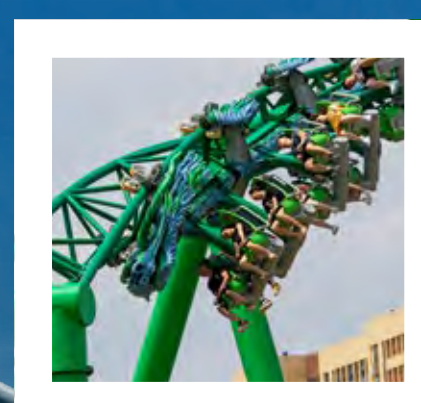

#### LSM LAUNCH COASTER

Explosive accelerations, steady cruising speeds, ground breaking maneuvers and near miss elements for a perfect thrilling experience granted by the strongest LSM drive system on the market. Available in a single or multi launch, swing and/or dueling configuration.

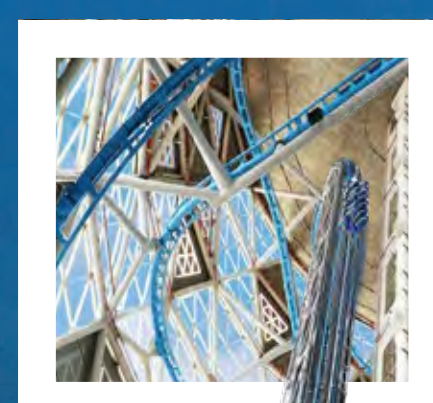

#### REVERSE FREE FALL COASTER

Unique weightless free fall journey with forward-backward seating.

#### SUSPENDED COASTER

Dangling feet at high speeds, fast inversions and even LSM launches.

#### VERTICAL LAUNCH COASTER

Exciting configurations paired with a unique vertical lift system (LSM or chain).

## MOTORBIKE

## ATV

## JET SKI

## FAMILY LAUNCH COASTER

Friction wheel driven launches or LSM Launches for a genuine first acceleration followed by one or more booster sections. Close to the ground track to enhance the feeling of speed for a true family attraction.

## FAMILY SPINNING COASTER

Family experience with (controlled and free) rotating vehicles. Launch(es) and special track features possible.

## SPINNING COASTER

Spinning with different seating possibilities: back to back, face to face or floorless. Launches and inversions possible.

## SUSPENDED FAMILY COASTER

Family-friendly with almost all features of the thrill version. Available with launch.

# HOT RACER

## HOT RACER

Single-rail track in combination with launch(es), dueling sections and trains with inline seating.

## SURF RIDER

Acceleration, spinning and weightlessness at different heights. Different capacities available.

## FAMILY LSM COASTER

Exciting, fast-paced LSM launched coaster for the whole family.  
- 1 meter (39 inches) minimum height requirement  
- Up to -0.4 g airtime  
- Inversion compatible

# FAMILY LAUNCH COASTER

NEW

## SKY JUMP

Riders experience the exact same feeling of skydivers, with their head facing down to the ground before finally getting back in vertical position when they open their parachute for a soft landing.

# SKY JUMP

# GYRO SWING

## GYRO SWING

Weightless sensation and high g-forces mix on a swing and spin rush.

## MULTI & GIANT DROP

Four different ride alternatives in one structure! Sit down, sit & tilt, floorless & tilt and stand up & tilt.

## GIANT DROP

Eight passengers share an amazing view as they wait for a breathtaking weightless surprise.

## GIANT DROP ON BUILDING

Placed on the side of a tower or integrated into a new building, these installations will provide a whole new level of thrill.

## GYRO / RING DROP

The seating ring structure rises and rotates slowly around the tower to give passengers a good all-around view of the surroundings before experiencing a breathtaking free fall.

## PARACHUTE TOWER

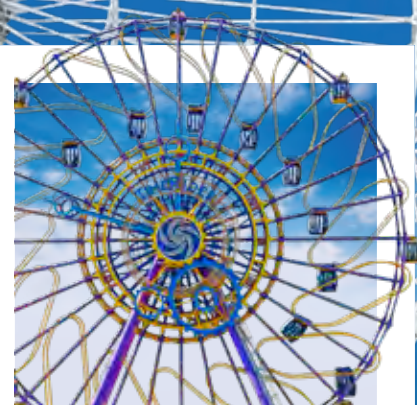

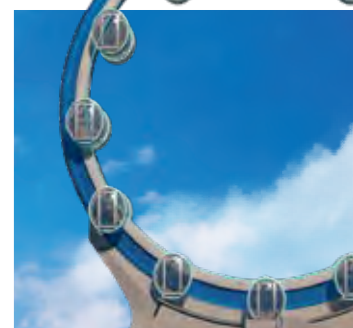

The high-speed up and down movements can satisfy the smallest thrill seekers or adults wanting to have fun with their kids.

# GIANT WHEEL

## GIANT WHEEL

Available from 80 to 165 meters of height with cabins of 8 or 15 passengers, guests are provided with an unforgettable experience in a comfortable and climate-controlled setting.

## COASTER WHEEL

This unique wheel design combines panoramic views with exciting movements created by cabins travelling along an elliptic track with sudden acceleration and swings.

## GIANT WHEEL ON BUILDING

This attraction can be installed at the top or integrated into the facade of a building delivering a new architectural concept.

## HUBLESS WHEEL

Enabling new views without obstructing old ones. Available in different layout variants and sizes.

From an iconic giant wheel to the most thrilling and tallest drop tower, **INTAMIN** can offer the most extensive variety of vertical rides and observation attractions on the market along with some of the most interesting applications on buildings and raising structures.

# FLYING ISLAND

## FLYING ISLAND

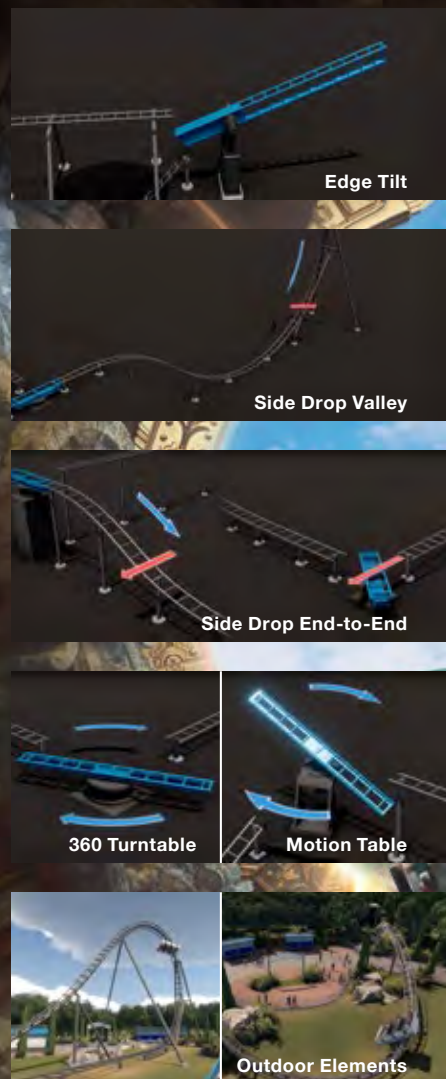

Passengers are lifted into the sky being offered astonishing views, in a rotating open-air or climate-controlled cabin on a pivoting arm.

## SUPER GYRO TOWER

Offering different heights and capacities, the Super Gyro Tower cabin gently raises and lowers while rotating to deliver a magnificent view. The walkable cabin is available with one or two levels in a seating and stand up configuration.

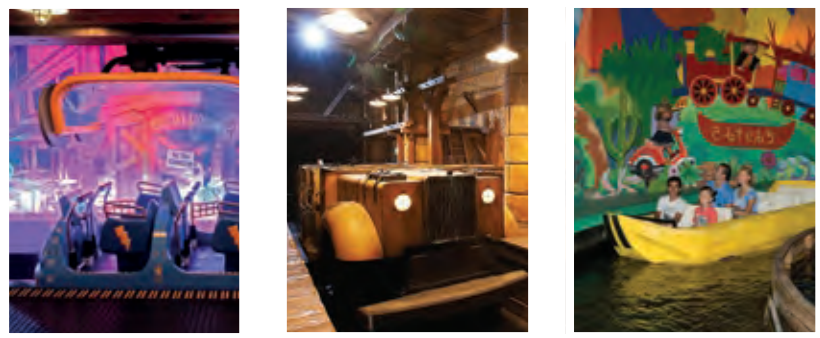

# MULTI DIMENSION COASTER

## MULTI DIMENSION COASTER

Unique moving SFX track elements to enhance the ride experience in a new way never felt on a roller coaster before. PreviousNext. Tailored to fit any storyline

- Friction wheel or LSM propulsion
- Countless special features (drop element, teeter totter etc.)
- Custom designed vehicles
- Various seating configurations
- Forward-backward launches

## DARK RIDE SYSTEM

Specialized multi-motion cars combined with simulator technologies for action journeys, suspended vehicles for flight-settings and boats for water-based environments.

State-of-the-art technologies are used to guarantee the most impressive performance on **INTAMIN** rides for thrill seekers in any amusement or theme park. Fully-immersive rides are also developed considering the most current projection systems including 3D format and augmented reality experiences.

# DOMERIDE THEATER

## DOMERIDE THEATER

Immersive 360° journey for 80 passengers with rotating and tilting movements.

## DYNAMIC MOTION STAGE

Stage a 360°-show, virtual or physical and bring your story to life with rotating, tilting and dropping moments.

## MOTION TOWER

Next generation immersive flying theatre combined with the thrills of a drop tower.

## 360 FLY ADVENTURE

Unique movements and special effects for a matchless immersive ride.

## RAPIDS RIDE

Invented by **INTAMIN** in 1979, the Rapids Ride is a must-have ride for any amusement park. This ride **never delivers** the same ride twice, and it is fun for all ages. Even more thrills can be added, such as a vertical lift or a down-chute splash with more unique features to come.

# RAPIDS RIDE

As the inventor of the Rapids Ride water ride with the vast experience on all different kinds of water rides and inspired by different roller coaster technologies, **INTAMIN** is able to offer exceptional water ride experiences ranging from a lazy river to the most thrilling elements, such as wild rapids, boat chutes, turntables, whirlpools, vertical lifts and backward runs. **INTAMIN** is at the forefront of the most advanced technologies and always researching the next level of excitement.

UP TO **20**  
PASSENGERS/BOAT

### SPILLWATER

This high capacity attraction can feature any number of down chutes and special effects which make this ride a hit among all ages. Available with inclined or vertical lift.

### ULTRA SURF

LSM-powered airtime machine with unpredictable spins, weightlessness and optional water features.

### GIGA SPLASH

The water ride icon equipped with rotating lift, featuring record-breaking drops and massive waves.

### WATER COASTER

A coaster and a water ride in one, featuring height, speed, splashes and a vertical lift.

### SLOW BOAT RIDE / TOW BOAT RIDE

The boat ride provides the impression of floating free while being guided by submerged booster pumps or an underwater cable.

## SPILL WATER

The monorail is not only a modern and comfortable means of transport, but also an advanced transportation system which can easily cope with high passenger volumes. **INTAMIN's** monorail systems feature elegantly designed trains and unique stations which serve to enhance the attractiveness and beauty of resorts, tourist environments and cities. From an elevated level, the passengers are able to enjoy a great view of their surroundings.

- High transport volumes
- High average speed, superior to road transport of tramways
- Fully automatic, driverless operation
- Low investment costs compared to other means of transport
- Trains run silently on the track

## MONORAIL SYSTEMS

### MONORAIL P6

A unique sight-seeing experience for exhibitions or large tourist events. A perfect solution for sightseeing in parks and tourist environments.

### MONORAIL P8

An affordable transport system for the medium and light transport capacity segment. Elegant trains provide passenger transport at an enhanced comfort level.

### MONORAIL P30

The P30 Monorail is designed for modern and efficient public transportation. It provides a fast service with high passenger volumes, capable to link city spots, resort venues or even airport terminals.
